Developing and deploying web-based tools to visualize marine animal movement data and explore abundance and trend of pinniped populations

19 November 2015

Alaska Fisheries Science Center developing Shiny web applications

Typical Information Flow

Data Collection & Research Initiatives

- Legislative and Regulatory Mandates
- Science and Conservation

Typical Information Flow

Data Analysis and Interpretation

- Big(ger) Data
- Highly Technical, Cutting Edge Statistics

Typical Information Flow

Publication

- Peer Reviewed Journals
- White Papers, Internal Memos, Contract Reports
- Status Reviews, Stock Assessment Reports

Analytical Deliverables

Deliverables are ...

- Static
- Often, Highly Technical

Should **also** be ...

- Interactive
- Flexible

The Modern Internet is Highly Interactive
(e.g. Google Maps, Online Banking)

The Public Expects Similar Interactivity from
Government Deliverables & Results

Shiny – It's R, It's Reactive, It's the Web

Shiny
by RStudio

A web application framework for R

Turn your analyses into interactive web applications

No HTML, CSS, or JavaScript knowledge required

<http://shiny.rstudio.com>

Shiny – It's R, It's Reactive, It's the Web

Here is a Shiny app

Shiny apps are easy to write. No web development skills are required.

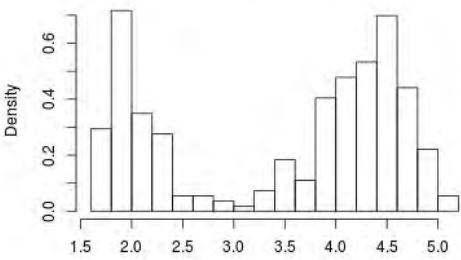

Number of bins in histogram (approximate):

20

☐ Show individual observations

☐ Show density estimate

Geyser eruption duration

Density

Duration (minutes)

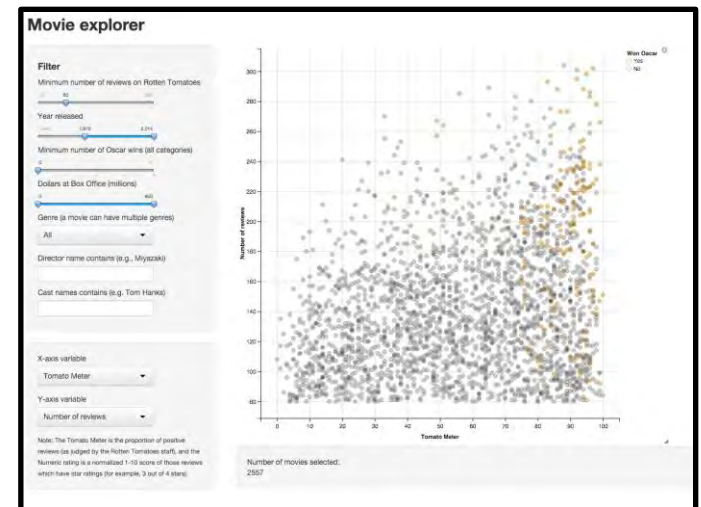

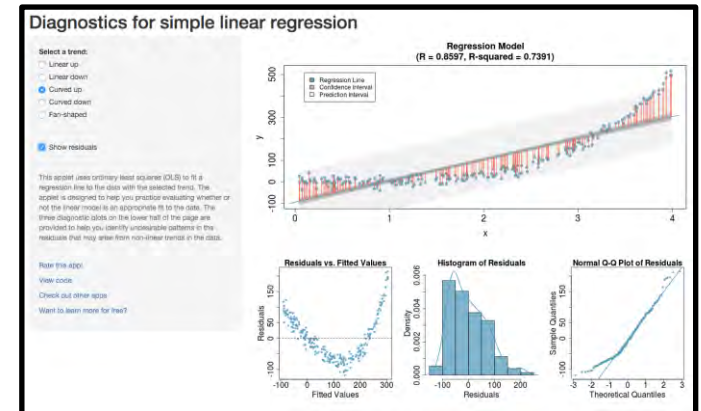

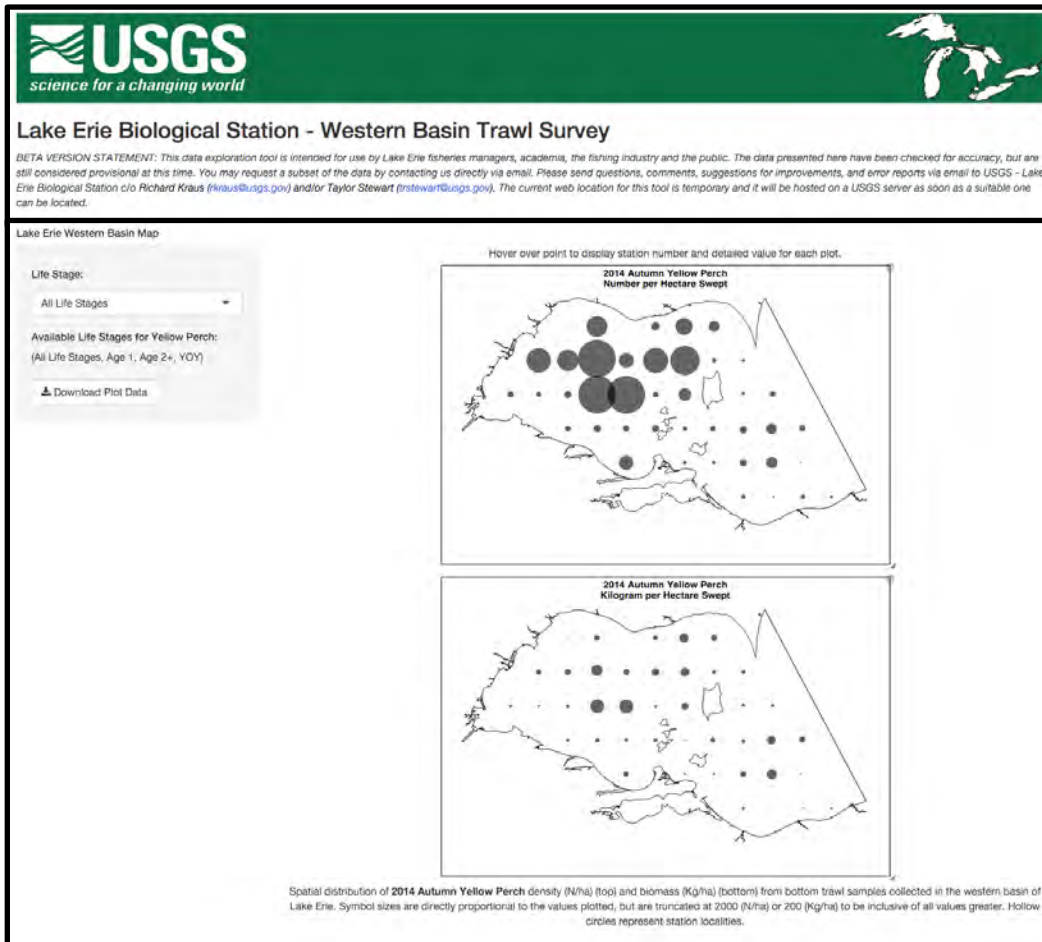

ui.R

server.R

```
shinyUI(bootstrapPage(  
  selectInput(inputId = "n_breaks",  
    label = "Number of bins in histogram (approximate):",  
    choices = c(10, 20, 35, 50),  
    selected = 20),  
  
  checkboxInput(inputId = "individual_obs",  
    label = strong("Show individual observations"),  
    value = FALSE),  
  
  checkboxInput(inputId = "density",  
    label = strong("Show density estimate"),  
    value = FALSE),  
  
  plotOutput(outputId = "main_plot", height = "300px"),  
  
  # Display this only if the density is shown  
  conditionalPanel(condition = "input.density == true",  
    sliderInput(inputId = "bw_adjust",  
      label = "Bandwidth adjustment:",  
      min = 0.2, max = 2, value = 1, step = 0.2)  
)  
)
```

<http://shiny.rstudio.com>

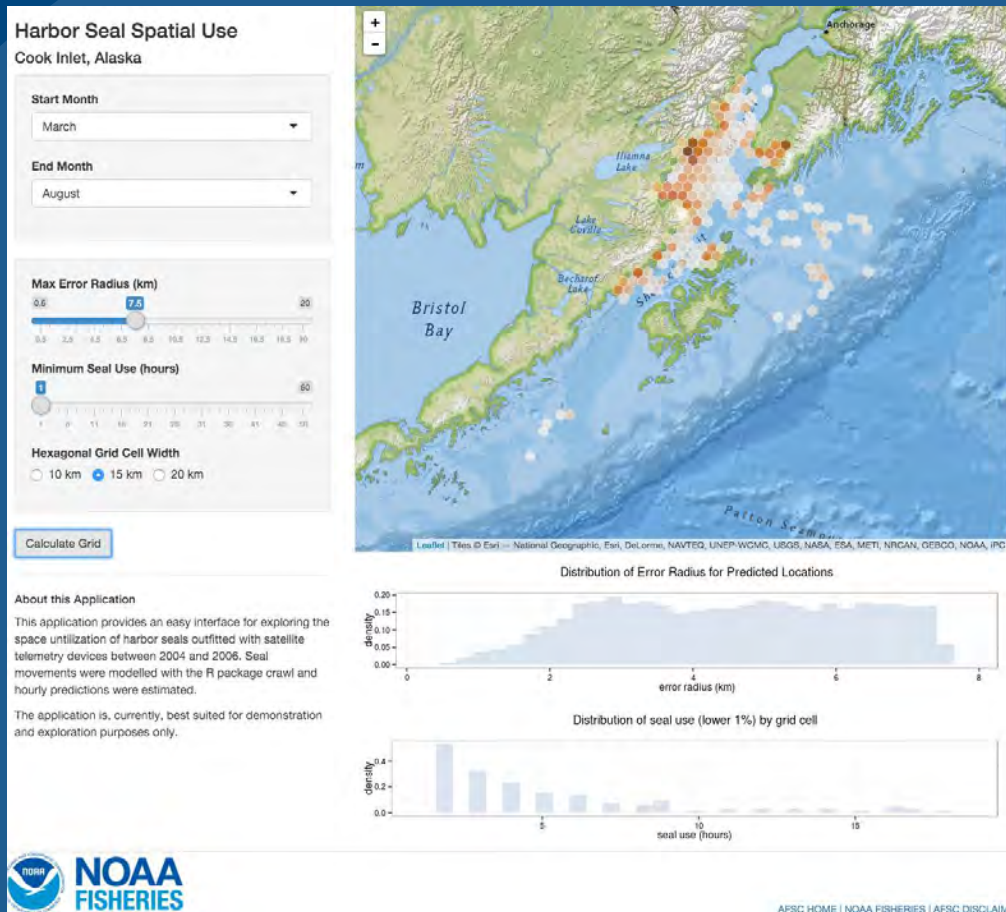

Shiny – It's R, It's Reactive, It's the Web

Demo: Harbor Seal Spatial Use

<https://jmlondon.shinyapps.io/akpv-cookinlet-app>

Shiny Application – Spatial Use of Harbor Seals in Cook Inlet, Alaska

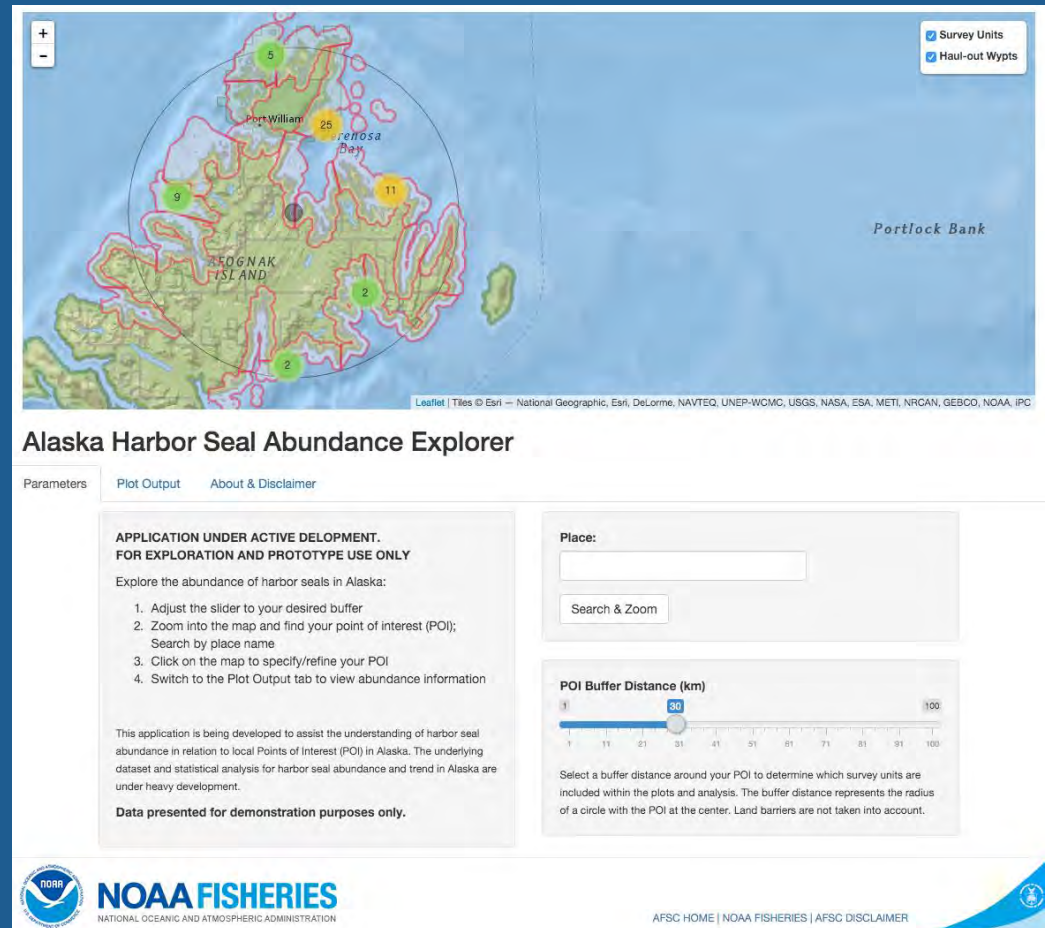

- BOEM/NOAA Collaboration
- Impacts of Oil & Gas Activities
- Incidental Take Authorizations (PR1)
- Built on R-package, crawl

Demo: Harbor Seal Surveys

<https://jmlondon.shinyapps.io/akpvsurveys-app>

Shiny Application – Abundance of Harbor Seals in Alaska

- One of the Largest Wildlife Regular Wildlife Surveys in the World
- Complex Statistical Analysis to Estimate Abundance
- Incidental Take Authorizations (PR1)
- ADF&G Consultations

NOAA FISHERIES

Other AFSC Shiny Applications

Distance Sampling

- Line-transect
- Report Generation

Ice Seal Hotspots

- Data Exploration
- Interim Access

Sea Lion Trends

- Flexible Trends
- Population Trajectories

Benefits of Shiny to NOAA Fisheries

- NMFS Scientists can create interactive and engaging scientific products with existing skillsets and expertise (no HTML, Javascript)
- NMFS Managers and Constituents can explore and engage with scientific products without having to also be technical experts or install/acquire special software
- Interaction = Better Science, Better Management

Public Access to Research Results

- Shiny applications complement and enhance NMFS Open Data and Open Science
- Shiny applications provide context to NMFS data and NMFS scientific analysis
- Integration with NMFS Web sites to improve communication of complex issues

Shiny Server Pro --- NMFS Hosted Solution

- Requires Dedicated Server / NMFS Personnel
- Availability to the Internet = High Security Req.
- Requires Dedicated NMFS Support Personnel
- NMFS Controlled = More Customization, Internal Database Access, Confidential Data
 - \$15,000/year + Hardware + Maintenance
- Open Source Solution – Internal Testing/Dev
 - \$0/year + Hardware + Maintenance

Shinyapps.io --- A Cloud First Option

- Server, Software and Maintenance handled by Rstudio, Inc. --- leading experts in R and Shiny
- Built on Amazon Web Services; 24/7 Uptime
- Integrated and Efficient Deployment of Applications – deploy/update from within the Rstudio IDE
- Professional Subscription: \$3,200/year
 - 10,000 Hours of Active Use/month
 - High Performance Computing Backend
 - Domain Customization

Approval/Deployment Process a Burden

The Cloud First policy mandates that agencies take full advantage of cloud computing benefits to maximize capacity utilization, improve IT flexibility and responsiveness, and minimize cost.

- Clear, Best-value for Majority of NMFS
- Much uncertainty remains
- Existing procedures not developed with small business providers in mind

Approval/Deployment Process a Burden

AFSC IT staff were very patient and collaborated to find a viable route to approval

- uncertainty, lack of guidance, and an overabundance of caution made the process more time consuming than any of us

wanted

AFSC Approval for *Shinyapps.io* as a 'Prototype/Demonstration' project for 1 year

- Amazon US East – FedRAMP/FISMA low/moderate
- No Sensitive/Confidential Data

Short Term Needs

- NMFS-level approval for use of Shinyapps.io by NMFS Scientists – low/moderate risk data
- Center-level, scientist led teams responsible for managing, deploying and supporting development of Shiny applications
- Collaborate on a series of best practices and guidelines to insure applications are of high quality

Long Term Needs

- Scientists as Software Developers
- Software/Web Apps as Fundamental Research Communications
- Provide Scientists Flexible, Reliable Access to Cloud Infrastructure and Solutions
- Create a 'Culture of Yes'
