National Saltwater Angler Registry

Federal law requires certain Hawaii recreational fishermen to sign up with the National Saltwater Angler Registry.

Who Needs to Register?

Hawaii recreational fishermen (including spear fishermen) who don't meet any of the exemptions listed below.

Who Is Exempt?

You do NOT need to register if you:

- fish only in freshwater;
- are under 16 years old;
- fish only on licensed charter boats;
- fish only within 3 miles from shore;
- are fishing under a valid commercial marine license; or
- hold a Federal Main Hawaiian Islands Non-commercial Bottomfish permit.

Out-of-state fishermen who are already registered with NOAA **do not** need to re-register to fish in Hawaii.

Is There a Fee to Register?

There is an annual \$25 fee to register. Indigenous fishermen must register, but are not required to pay a fee.

Why Register?

The registry is the law, and it helps NOAA Fisheries and fishermen work together to collect better catch data to ensure the future of marine recreational fishing in Hawaii.

To register or learn more, go to:

www.CountMyFish.noaa.gov or call
1-888-674-7411.

Frequently Asked Questions

What is the purpose of the registry?

The registry serves as a national directory of recreational fishermen. It allows NOAA Fisheries to more efficiently contact fishermen to ask questions about recent fishing activity. This information, when combined with numerous other data sources, helps NOAA Fisheries to evaluate the health of fish populations and to check that protections put in place to conserve fisheries will be fair, effective, and based on sound science.

Should I just get myself a commercial marine license and save myself the trouble?

You should get the license that best meets your fishing needs. Commercial fishing licenses enable fishermen to sell their catch in Hawaii. The registry is for fishermen who don't make their primary living from fishing, even if they mostly fish for food for themselves, their families, and their neighbors. Anyone considering a commercial license should also be aware of the reporting requirements of the commercial fishery.

Do recreational fishermen really have that great of an impact on the resource?

Many people assume the number of fish caught by recreational fishermen must be minimal in comparison to the commercial harvest. The truth is that more than 150,000 boat-based recreational fishermen in Hawaii typically land between 10 and 15 million pounds of fish each year.

Can I register and fish the same day?

Yes. You can register online or by phone and fish the same day. Simply write down the registration number to present to law enforcement officials, if requested. A registration card will follow in the mail.
