PRIV/RENTAL BOAT	30

The APAIS 2013 is further allocated to specific time intervals, 4 per day, by mode, month, and day-type. These sub-allocations are based on historical distribution of fishing effort, by mode. The NMFS is currently analyzing data to determine the appropriate distribution among the 4 time intervals as specified in the SOW and will make those allocations available upon request as soon as the analysis is completed. This completion is expected before the proposal submission deadline.
