

# 1. FUS - Fisheries of the United States

At the home page, the user can choose either Fishery One Stop Shop (FOSS) or Fisheries of the United States (FUS) by clicking its icon. FUS is also available via the **FUS tab** from within the FOSS section of this system.

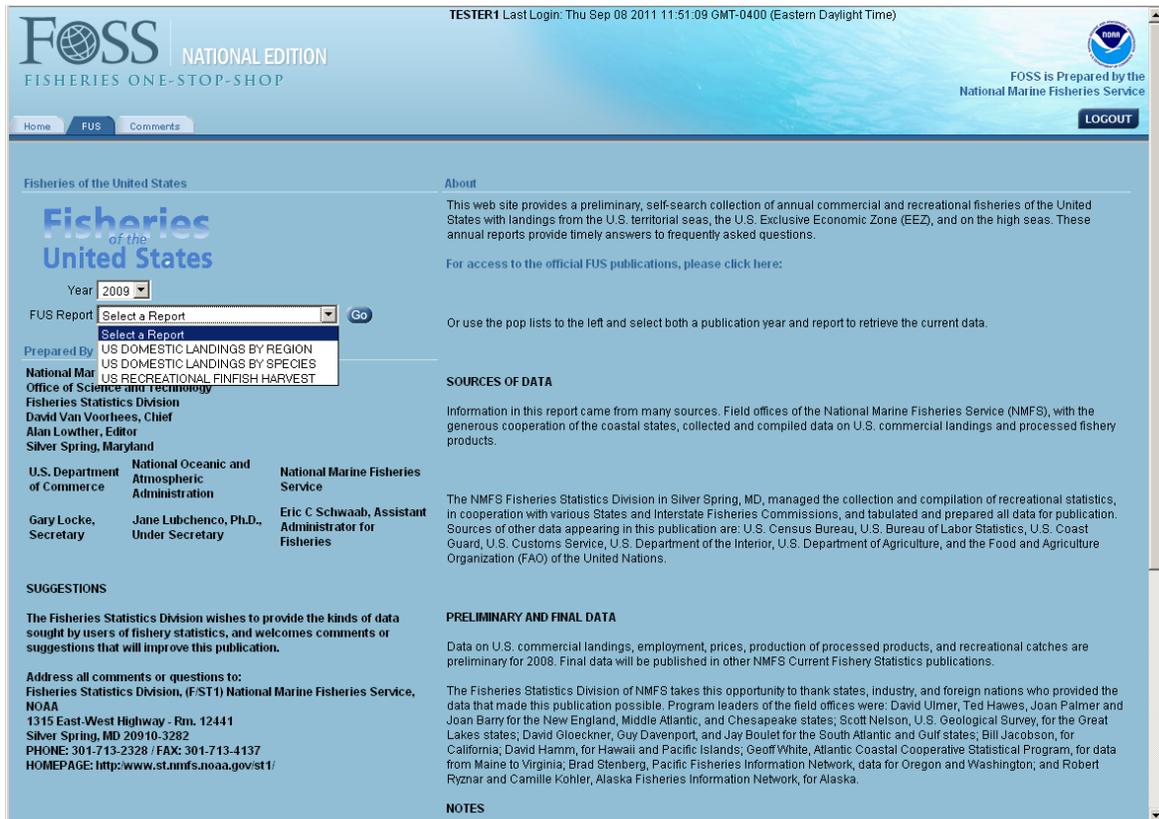

Figure 1 - FUS Main Page

## Selecting Year and Report

**Fisheries of the United States** - The user can navigate to actual reports that provide fishery data via clicking the graphic on the left hand side of the Home page. Once on this page the user can choose to filter by Year and Report:

- *Select* menu entry for Year.
- *Select* menu entry for FUS Report.
- *Pick Go* to display report.

Currently there are three report types available:

- The 'U.S. Domestic Landings by Region and State'
- The 'U.S. Domestic Landings by Species'
- The 'U.S. Recreational Finfish Harvest'

The Domestic Landings report displays statistical data for various unit amounts of fish that were caught and brought back to Fishery Landings. The Recreational Finfish Harvest report contains data collected for recreational fishing.

From the Fisheries of the United States page:

- *Click on* the **Home tab** to be brought back to the Home page.

The following screen is a sample of the FUS Domestic Landings report discussed above for Years set for 2008 and 2009:

Footnotes

Note: The data presented here may not agree with the data in published versions of Fisheries of the United States for the following reasons:

- The data presented here reflect totals of non-confidential species only. Published Fisheries of the United States data by state (page 6) include all landings of all species.
- The data presented here may have been updated more recently than those in the published Fisheries of the United States

(1) Landings are reported in round (live) weight for all items except univalve and bivalve mollusks such as clams, oysters, scallops, which are reported in weight of meats (excluding the shell). Landings for Mississippi River drainage area States are not available.  
(2) Data not available.  
(3) Revised.

NOTE: Data are preliminary. Landings of Alaska pollock, Pacific whiting, and other Pacific groundfish that are caught in waters off Washington, Oregon and Alaska and are processed at-sea aboard U.S. vessels are credited to the State nearest to the area of capture. Totals may not add due to roundings. Data do not include landings by U.S.-flag vessels at Puerto Rico and other ports outside the 50 States. Therefore, they will not agree with "U.S. Commercial Landings" beginning on page 8. Data do not include aquaculture products, except oysters and clams.

FUS Publications
